

Ubanx is the easiest way for consumers to access crypto and digital financial services, providing a network of world-class retail spaces and the best consumer finance apps.

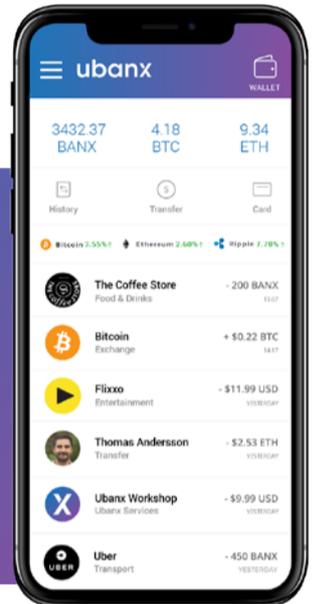

* This render is a concept, actual spaces will differ in sizes and themes.

Ubanx Spaces

Located in selected cities, Ubanx Spaces intend to provide the mainstream public assistance, education and onboarding for the digital finance world and access to the best crypto related products such as hardware wallets and mining equipment. Ubanx visitors are expected to get help from crypto experts and be able to cash in/out using crypto ATMs. Ubanx Spaces are intended to serve as coworking locations as well as for the Ubanx Accelerator and Ubanx Crypto School facilities.

Designed for everyone, powered by you.

The Ubanx approach: retail + digital

With an experience-driven approach, the Ubanx app offers a consumer finance value proposition that seamlessly integrates the user's crypto wallet with exchange and other services offered by a curated selection of partners.

Seamless support for crypto/digital currencies.

Access to exchange services and more, provided in partnership with a curated selection of third party financial services providers.

Token issuance

The Ubanx products and services and the Ubanx Community will be powered by the BANX Token. The BANX Token will initially be created as an Ethereum ERC-20 token, but the Ubanx vision is blockchain-agnostic and Ubanx intends to support other protocols in the future.

The BANX Smart Contracts, one per each exclusive geographic area, allows BANX holders to participate individually in auctions for the exclusive right to operate of Ubanx Spaces in the geographic area.

BANX Token Holders bid individually for exclusive local and regional rights to operate Spaces.

The winning bidder will become eligible for the exclusivity to operate the Ubanx Space within the assigned territory.

Token distribution

Total Tokens	1,000,000,000
Token Presale	35%
Public Token Sale	25%

A world-class team from crypto and retail banking

The team has successfully developed, and grew financial and consumer value propositions, including Avanta, the first prepaid card-based app in the South Cone, Bitsign the blockchain abstraction layer, La Maquina, the largest co-working network in Argentina and the second-largest marketplace in Latam with over +\$50MM raised. Their previous apps were featured by Time, CNN, and Fox. Ubanx founders are also recipients of awards such as the prestigious MIT TR 35, Endeavor High-Impact Entrepreneur. Previous companies by the team were invested by Mastercard, Silicon Valley Bank, Draper Cygnus VC, and other top Venture Capital firms. Ubanx is also accelerated by Blockchain Accelerator Argentina.

A solid advisory board

Ubanx's Advisory boards includes some of the most recognized professionals in the Crypto community, including the Alchemist team, Steven Nerayoff (structuring of Ethereum) and Jacob Farber.

Token presale

Open for a limited time

Token buyers seeking discounts before the token sale opens to the public can join the token presale, which will allocate 35% of the tokens. Referral only at ir@ubanx.io.
